- ☒ 12A. Exhibit A, Origin and Breeding History of the Variety (See Section 52, P.L. 91-577)
- ☒ 12B. Exhibit B, Botanical Description of the Variety
- ☒ 12C. Exhibit C, Objective Description of the Variety
- ☒ 12D. Exhibit D, Data Indicative of Novelty
- ☒ 12E. Exhibit E, Statement of the Basis of Applicant's Ownership

The applicant declares that a viable sample of basic seed of this variety will be deposited upon request before issuance of a certificate and will be replenished periodically in accordance with such regulations as may be applicable. (See Section 52, P.L. 91-577).

14A. Does the applicant(s) specify that seed of this variety be sold by variety name only as a class of certified seed? (See Section 83(a), P.L. 91-577) (If "Yes," answer 14B and 14C below.) ☐ YES ☒ NO14B. Does the applicant(s) specify that this variety be limited as to number of generations? ☐ YES ☒ NO

14C. If "Yes," to 14B, how many generations of production beyond breeder seed?

Applicant is informed that false representation herein can jeopardize protection and result in penalties.

The undersigned applicant(s) of this sexually-reproduced novel plant variety believes that the variety is distinct, uniform, and stable as required in Section 41 and is entitled to protection under the provisions of Section 42 of the Plant Variety Protection Act (P.L. 91-577).

## INSTRUCTIONS

**GENERAL:** Send an original copy of the application, exhibits and \$50.00 fee to U.S. Dept. of Agriculture, Consumer and Marketing Service, Grain Division, Hyattsville, Maryland 20782. Retain one copy for your files. All items on the face of the form are self-explanatory unless noted below.

## ITEM

- 5 Insert the date the applicant determined that he had a new variety.
- 12a First, give the genealogy, including public and commercial varieties, lines, or clones used, and the breeding method. Second, give the details of subsequent stages of selection and multiplication. Third, indicate the type and frequency of variants during reproduction and multiplication and state how these variants may be identified. Fourth, provide evidence on stability.
- 12b First, give any special characteristics of the seed and of the plant as it passes through the seedling stage, flowering stage and the fruiting stage. Second, describe the mature plant and compare it with a similar commercial variety grown under the same conditions, and indicate the differences.
- 12c A supplemental form will be furnished by the PVPO to describe in detail a variety for each kind of seed.
- 12d Provide complete data indicative of novelty. Seed and plant specimens may be submitted and seeds submitted may be sterile. Where possible, include photographs of plant comparisons, chemical tests, etc.
- 12e Indicate whether applicant is the actual breeder, the employer of the breeder, the owner through purchase or inheritance, etc.

APPLICATION FOR PLANT VARIETY PROTECTION CERTIFICATE

VARIETY - ~~8126~~ 'RAIDER' R/S

Exhibit 13A

A program was started in the fall of 1965 to incorporate white seed into the variety, Provider, by the back cross method.

Provider was crossed with Harvester and by the spring of 1969, three back crosses to Provider had been made and these back crosses had been selfed for four generations so that the F-4 of the third back cross was available for trial. Eighty five lines consisting of the mass of seed of 3 plants each were tested.

At the time of processing maturity, these lines were evaluated and it was found that, although each line was quite similar to Provider, except for seed color, flower color and anthocyanin pigment in stems and midribs, there were some variants.

Some progenies had a high tendency toward early breakdown around the seed; some had short, rough, oval pods; some had aborted seed in pods; some plants were more spreading and with longer racemes.

After harvest, it was noticed that some lines had an excessive number of seeds with ruptured seed coats.

Out of the eighty five lines, six were selected for similarity to Provider in most respects, except for white seed, white flower color and absence of anthocyanin pigment in stems and midribs.

These lines were bulked and after 3 generations appear to be homozygous, except that 1 plant in 8000 may be more spreading and with longer racemes.

VARIETY - ~~8126~~ 'RAIDER' R/S

Exhibit 13B

Botanical Description of the Variety.

Seeds are white with a very faint vein-like undercoat pattern. The Hilum is not prominent. Seed is oval in cross-section and length is about twice the width.

Seedling growth is normal. Hypocotyl is slightly green and without anthocyanin pigment as found in Provider. Plant is upright, stiff and compact with most of the pods set in the upper third of the plant. Plant height will average 2 cm. less than Provider and the same is true for width.

Petal color is white as compared to pinkish purple in Provider. Flowers are clustered in short racemes near the top of the plant.

Color of leaves is slightly lighter than Provider and there is no visible anthocyanin pigment in the midribs. The outer leaflet of the first trifoliate leaf averages 2 cm. less in length and 1 cm. less in width than Provider. Leaflet outline is very similar to Provider. Pods are straight and medium green in color. Length of mature pods average 1 cm. less than Provider. Spur is straight and 1.5 to 2 cm. in length.

Number of days to processing maturity is the same as for Provider.

Re: Change of Assignment.

Dear Mr. Evans:

This letter is in reference to your correspondence to me, dated July 14, 1987. I wish to make it clear that this change of assignment is to indicate a name change only, from U.F. Genetics, Inc. to Sunseeds Genetics, Inc.

Also, in reference to 'Mystro' tomato, have Item 1 read Sunseeds Genetics, Inc. and issue the certificate to Sunseeds Genetics, Inc.

Enclosed please find a check in the amount of \$170.00 to cover the cost of changing the certificates.
